

# Campaspe System

The Campaspe System supplies the town of Goornong. Raw water is supplied from the Campaspe River.

We service around 192 water connections, with a population of more than 650. There is no wastewater service in this system.

## SECURING OUR WATER FUTURE

Our priority is securing water for our customers and ensuring the demand for water is met for the next 50 years.

We use water resource and climate data from the last 130 years, as well as population growth, household water usage and climate change projections to forecast our future water resource position.

We need to continually adapt to meet these challenges, and balance the social, environmental and economic needs to plan for a sustainable future.

Our Urban Water Strategy identifies the best mix of actions to provide water services now and into the future. Building bigger and better infrastructure is not the only way to ensure security of supply. We can look for new ways to reduce the water we use, find new water sources, or reuse more water.

### Source water

Raw water for the township of Goornong is sourced from the Campaspe River, approximately 7 kilometres to the east. Water is pumped from the river to the Goornong service basin which can hold up to 6 megalitres.

### Treated water

The Goornong Water Treatment Plant is located on the Goornong-Fosterville Road (near the intersection with Bagshot Street) in the west of the town. The plant can treat up to 80 kilolitres a day. The treated water is held in four clearwater storages with a total capacity of 220 kilolitres and pumped to the Goornong elevated tank and into the water network.

### Water reclamation

There is no wastewater network for the township of Goornong. Townships without wastewater systems generally have septic tanks or other onsite wastewater systems to treat and dispose of or recycle domestic wastewater at unsewered sites. Local council is responsible for the developing and managing domestic wastewater programs and plans for onsite wastewater management.

### Water reuse

There is no water reuse in the Campaspe System as there is no wastewater service.

## HELP PLAN OUR WATER FUTURE

Did you know you can connect with us on a range of issues through Connect Coliban, our online portal for engagement and feedback, allowing us to engage directly with our customers. Find out about and follow the progress of our projects and help us achieve our vision of water to live, grow and enjoy at [www.connect.coliban.com.au](http://www.connect.coliban.com.au)

You can provide feedback at any time by calling **1300 363 200** or emailing [coliban@coliban.com.au](mailto:coliban@coliban.com.au)
